

Installation Steps:

1.

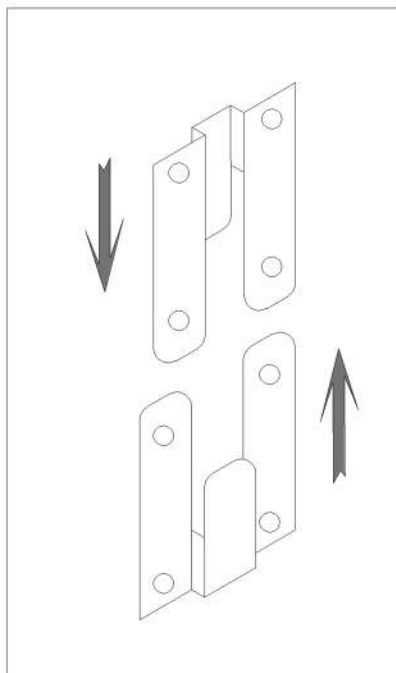

Measure the distance between the clips behind the panel

2.

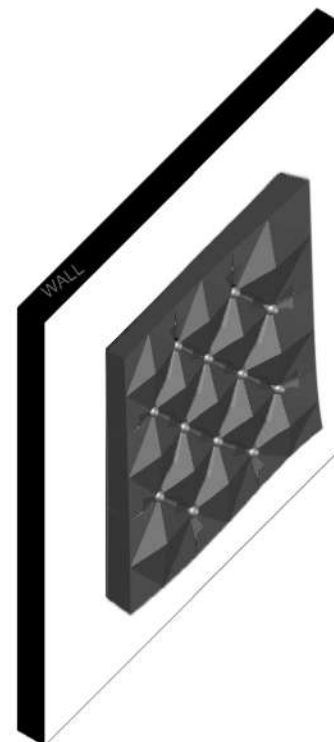

Mark the clips on the wall at the same distance as that of the clips behind the panel. Screw the clips on the wall after checking it with level meter

3.

The clips are in the arrangement of male-female. just pick up the panel and push it into the clips screwed on the wall.

4.

The panel will hang on the clips securely.
