

Installation Steps:

1 .

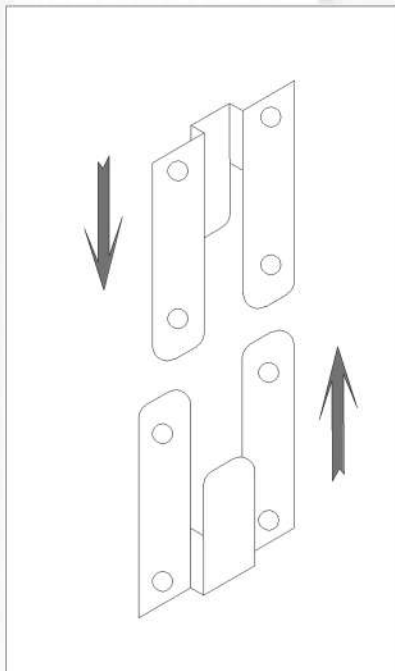

Measure the distance between the clips behind the panel

2 .

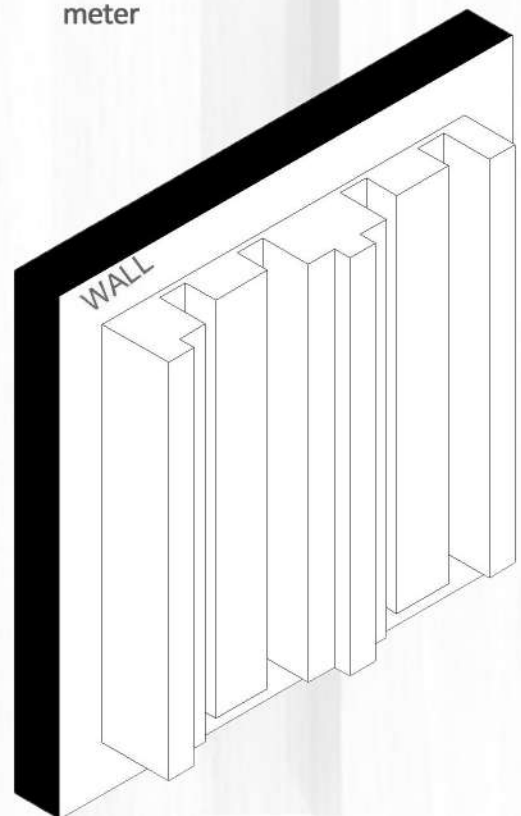

Mark the clips on the wall at the same distance as that of the clips behind the panel. Screw the clips on the wall after checking it with level meter

3 .

The clips are in the arrangement of male-female. just pick up the panel and push it into the clips screwed on the wall.

4 .

The panel will hang on the clips securely.
